HEALTHCARE MODALITIES

Improve equipment performance. Extend the life of components. Reduce overall costs. Support customer needs. Partner with an industry-leading, trusted Medical Repair, Manufacturing and Parts provider to improve your agility and profitability while meeting regulatory requirements. DEX provides options to keep your medical equipment up and running.

- 35+ years of experience in providing outsourced solutions for hi-tech electronics and complex technologies across numerous sectors
- Electrical, electromechanical and technological manufacturing and engineering core competencies
- Service solutions designed and executed with foundations of engineering, systems and process infrastructures
- State-of-the-art design techniques, standards-based processes, and extensive analysis tools
- Strict certifications and compliances to ensure quality, safety and efficiency of products, services and systems

Alleviate gaps between forward production and end of product life requirements. DEX Solutions help to bridge the gap during events such as regulation delays, resource constraints, or changes in original consumption projections.

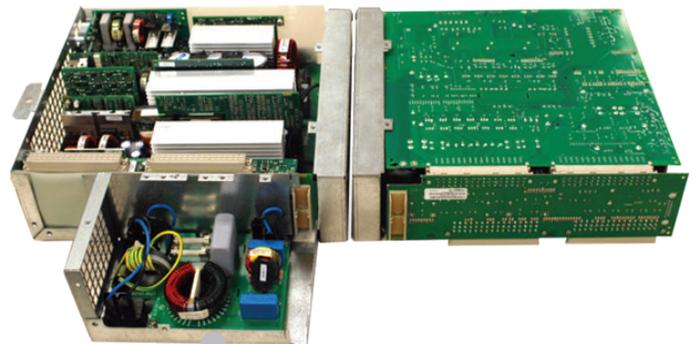

## STRATEGIES

DEX was built on the principal of delivering the lowest total cost solutions to our clients by leveraging our core competencies in engineering, manufacturing, and repair. As an industry leader we demonstrate, on a daily basis, our innovation, flexibility, and technological expertise in the solutions we provide. With capabilities ranging from reverse engineering, depot repair and service parts management to asset recovery, advanced exchange and warranty support solutions, our team assesses and analyzes your individual needs to create a customized, real-world strategy. In addition, our vendor and asset management strategies help to control costs, drive service excellence and mitigate risks.

## REPAIR

Through DEX's best-in-class, OEM quality repair services and cutting-edge engineering expertise, we are able to provide solutions that can extend the lifespan of your medical components and equipment. DEX best-in-class repair services are performed by A+ certified industrial electronic technicians, supporting numerous Fortune 500 companies.

The DEX Repair solution significantly reduces replacement costs by as much as 70% through repairing defective electronic and electromechanical components versus purchasing new. Our streamlined repair process ensures quick 10 day turn-around times with typical repair cycles.

**PARTIAL COMPONENTS LIST**

- Advanced Input Devices
- Cameras
- Chillers
- Collimators
- Consoles
- Consoles / User Interface
- Fiber Optic Interface
- Film Magazines
- Gradient Amplifiers
- Magneto Optical Drives
- Monitors (CRT, LCD, LED)
- Motor Drives & Controllers
- Power Supplies
- Printers
- Probes
- RF Amplifiers
- RF Filters
- Servo Amplifiers & Controllers
- System Boards
- Workstations

**ENGINEERING CORE COMPETENCY**

- Highly trained Electrical, Electronic, Mechanical, Computer, Quality and Process engineers
- Reverse engineering capabilities when schematics, test beds or test procedures unavailable
- Root cause analysis and defect management
- Test equipment, schematics and automated in-process inspection systems design

**MANUFACTURING**

DEX's uniquely structured manufacturing solutions are designed to increase a product's time-to-market, improve product features and achieve each client's cost objectives. DEX engineers continually explore the latest technologies and design techniques, while sharing best practices across each functional area of our global organization.

- **Reverse Engineering & Manufacturing** – Design upgrades and innovative, manufactured alternatives for irreparable components
- **Remanufacturing & Rebuild** – Product refurbishment, to like-new condition, employing cost effective repair or replacement of parts and components, to maximize product life expectancy and eliminate waste resulting from obsolete or unusable parts

**PARTS**

The DEX Parts solution provides access to a worldwide sourcing network and rapid fulfillment of screened, tested, certified and warranted replacement parts. DEX is a trusted, open-market supplier who can improve fill rates, decrease cycle times, and guarantee quality by leveraging 35+ years of experience in sourcing hard-to-find or out-of-production parts.

As additional feature of our Parts Sourcing Solution, we offer a flexible Core Returns Program, which helps our clients realize an additional cost savings.
